

NLP Tuto

Find the text "Completext.txt" on Moodle

1. Create a nlp doc from Completext.txt and name it complete_doc.
2. Extract all the tokens
3. As you know, Lemmatization is the process of reducing inflected forms of a word while still ensuring that the reduced form belongs to the language. This reduced form or root word is called a lemma. Print all Lemmas in complete_doc
4. Remove stop words then compute the words frequencies
5. print the 5 commonly occurring words with their frequencies
6. Print the unique words
7. Part of speech or POS is a grammatical role that explains how a particular word is used in a sentence.
In spaCy, POS tags are available as an attribute on the Token object
Print the tokens, the token.tag, the token.pos and the spacy explation of the token.tag
8. Extract the Nouns and the adjectifs
